

## HERB TRIMMER – PRUNING BAR MTA MSC

The MTA herb trimmer's structure is built entirely from anodized aluminium and is equipped with a two-stroke combustion engine.

The herb trimmer is fitted with a variable width trolley that allows the operator to adjust the distance between the wheels' to their working table. It is possible to create a structure with a cutting capacity (blade length) that varies from a minimum of 600 mm to a maximum of 1700 mm.

The cutting height is also adjustable from a minimum of 60 mm to a maximum of 500 mm.

The herb trimmer is ideal for the rapid and uniform trimming of any kind of potted plant, even the most dense and woody stemmed.

The handle-bar is fitted with an accelerator and stop button. The machine's transmission and moving components are protected by two fixed bars that block access to the blades.

**EXTREMELY LIGHT**

WEIGHT:	25 Kg
Blade length:	min 600 mm max 1700 mm
Cutting height:	min 60 mm max 500 mm
HEIGHT:	950 mm
WIDTH:	1.400 / 2400 mm
DEPTH:	120 mm
MOTOR:	two-stroke 2% mixture

- Aluminium structure
- Adjustable cutting height
- Variable operating width
- Two-Stroke motor 2% mixture
- 4 wheels for maximum cutting precision and stability
- Adjustable distance between wheels
